

# INSTALLING N4L CERTIFICATE (Windows 8 Machines)

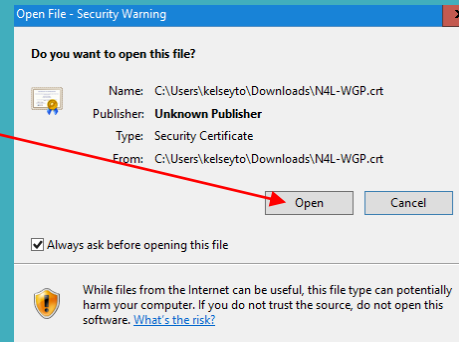

- All WiFi devices need to have the N4L Certificate installed prior to them being able to access any websites.
- Connect to the WGPLearner Wifi
- Go to [www.wgpcollege.school.nz](http://www.wgpcollege.school.nz)
- Enrolments
- BYOD tab
- N4L Certificate

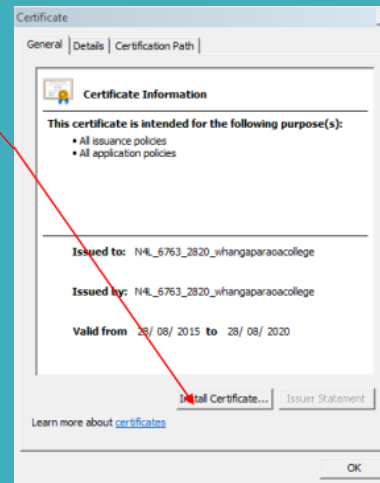

- Certificate will appear on your toolbar at the bottom left of your screen. Click on N4L-WGP.crt

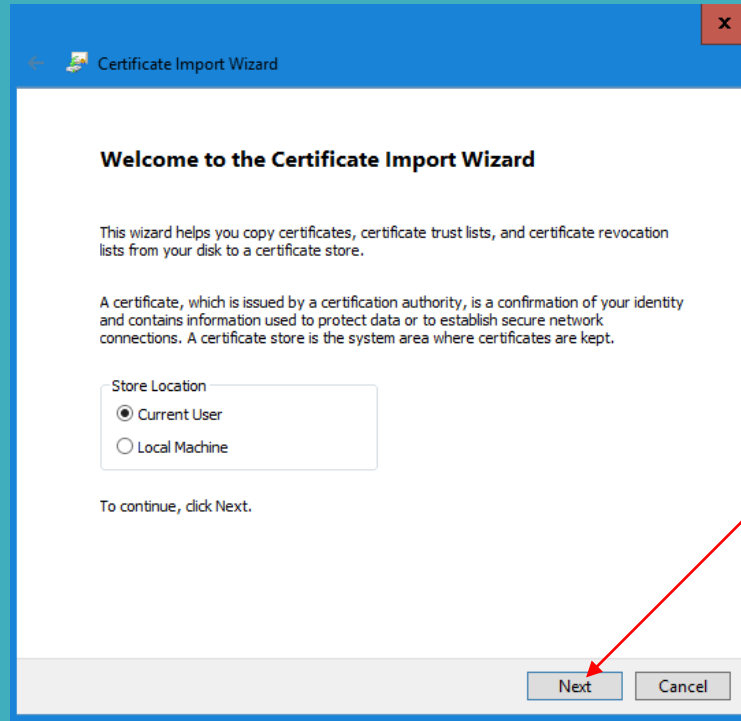

- Click on Open

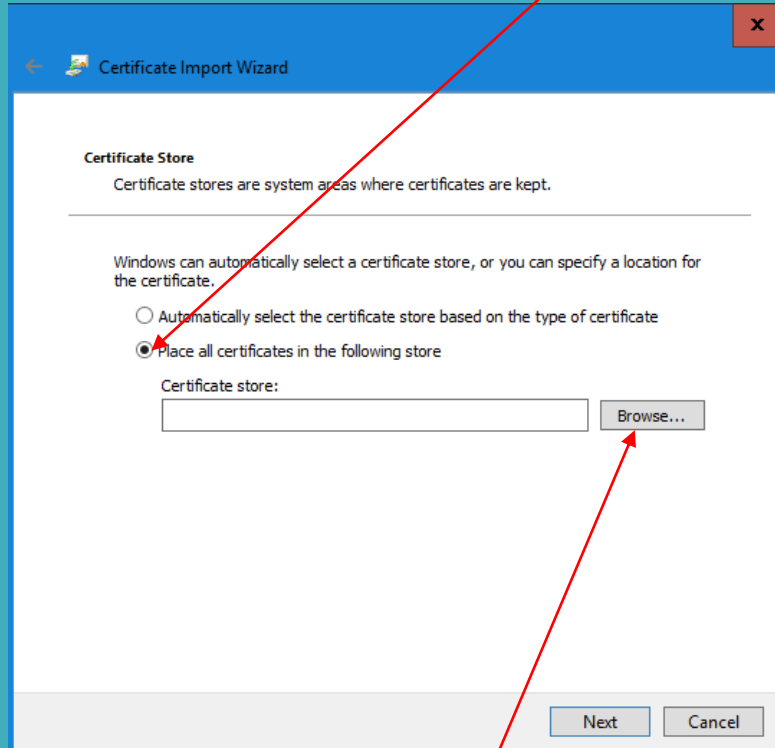

- Click on Install Certificate

- You will see “Welcome to the Certificate Import Wizard” it should default to current user, to continue click “Next”

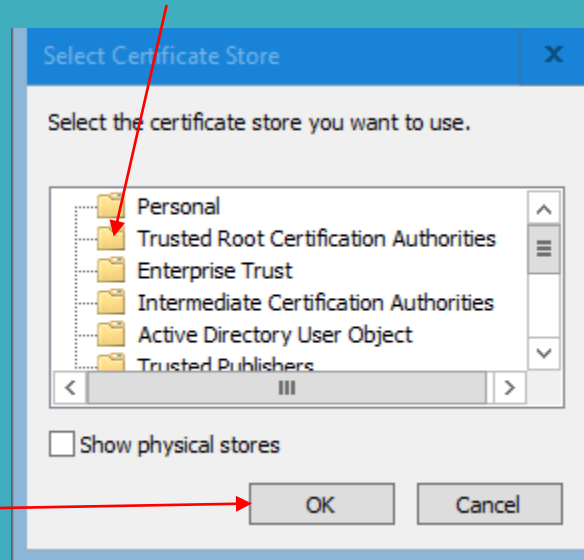

- Click on the option “Place all certificates in the following store”

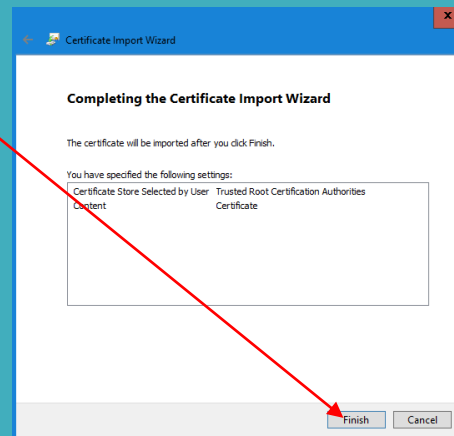

- Then click “Browse”

- Click on the “Trusted Root Certification Authorities” folder

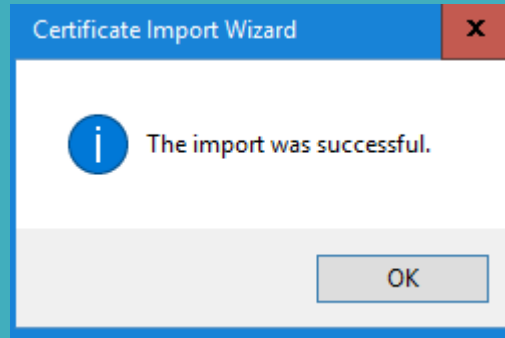

- Click OK

- Click “Finish”

- You should now see the following message:

- Click OK to close the certificate wizard
