

INSTALLING N4L CERTIFICATE iPads

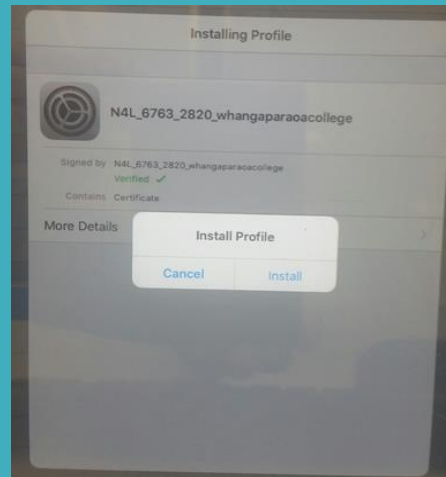

- All WiFi devices need to have the N4L Certificate installed prior to them being able to access any websites.
- Connect to the WGPLearner Wifi
- Using Safari, go to www.wgpcollege.school.nz
- Enrolments
- BYOD tab
- N4L Certificate

- Click on N4L Certificate
- “Install Profile” box will appear, click “Install” (The iPad will prompt you to put in your pin, if you don’t already have a pin on your iPad, you will need to create one).

- Click Install

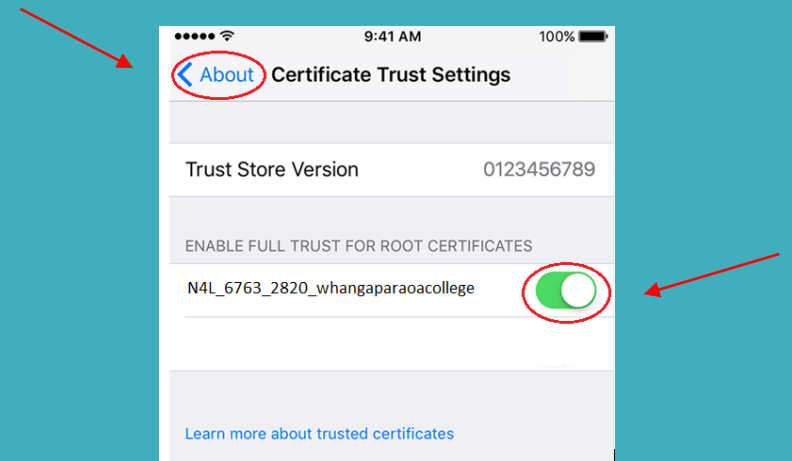

- Click “Done”

The certificate has now been installed, to check go to a web browser, www.google.com and do a search, i.e. cats.

If you cannot get onto the internet at this point you will need to follow the steps below to “trust” the certificate. (only for iOS10.3 and above)

- Go to General Settings
- Click on “About”
- Click on “Certificate Trust Settings”
- Enable the button beside the certificate name

The certificate has now been installed and trusted, check the web browser again www.google.com and do a search, i.e. cats.

If this still does not work, please bring your device to the ICT suite to assist.
